PROFESSIONAL SUMMARY

Data and BI Engineer with 3+ years building and owning Microsoft Fabric lakehouse, pipeline, semantic-model, and reporting solutions, backed by 10+ years across analytics, finance, and consulting. Hands-on with PySpark, SQL, Python, dimensional modelling, CI/CD, and governed BI delivery for hundreds of global users. Combines engineering execution with strong FP&A and sales domain expertise and a track record of leading cross-functional adoption.

TECHNICAL SKILLS

- **Data engineering:** SQL, dynamic SQL, stored procedures, Python, PySpark, Pandas, Polars, PyTest, Alembic, ETL/ELT, incremental processing
- **Cloud and platforms:** Microsoft Fabric (lakehouse, pipelines, dataflows, notebooks, semantic models), ADLS, AKS, Docker
- **Data modelling and BI:** data modelling (star/snowflake schemas, medallion architecture), Power BI, DAX, Power Query, Tableau, row-level security
- **Engineering practices:** Git, Azure DevOps, GitHub Actions, CI/CD, fabric-cicd, PBIP, dbt, REST APIs, FastAPI
- **Certifications:** Databricks Certified Data Engineer Associate; Microsoft Certified: Power BI Data Analyst Associate (PL-300); ACCA Associate

WORK EXPERIENCE

DXC Luxoft Serbia

Feb. 2023 – Present

BI Engineer

Belgrade, Serbia

- Administration of Fabric workspace: lakehouse, 10+ pipelines and dataflows, notebooks, semantic models, and a portfolio of up to 30 Power BI reports serving hundreds of users worldwide; integrated Databricks, SharePoint, and OneLake sources.
- Implemented PR-based CI/CD across separate development and production Fabric workspaces using Azure DevOps, Git, PBIP, and fabric-cicd; introduced version control, isolated testing, collaborative development, and AI-assisted IDE workflows.
- Combined finance, sales, and HR data in a Power BI solution with multi-layer row-level security, enabling regular performance reviews for hundreds of sales managers.
- Led Fabric adoption, CI/CD rollout, and reporting-source migrations across domains, coordinating stakeholders and training colleagues on the new development process.
- Coordinated the core financial reporting model and Cognos-to-Tableau pipeline refactoring to sustain an hourly refresh cycle with fewer than 1% failed updates.
- Delivered global sales reporting across regional, line-of-business, and product dimensions, giving leaders recurring visibility into sales progress and target/budget achievement.
- Design and implementation of a code-first self-service reporting platform on Azure using AKS, Streamlit, SQLMesh, ADLS, and DuckLake.

X5 Group - Vprok.ru Online Retail**Oct. 2021 – Feb. 2023****Financial Analyst** in FP&A Department

Moscow, Russia

- Automated activity-based costing for internal production with Python and SQL, processing millions of production and sales records into management P&L reporting with allocated direct and indirect costs.
- Designed a week-over-week delivery-zone performance model comparing revenue with delivery spend, identifying persistently underperforming zones and supporting service-area and cost decisions.
- Automated 10+ management reporting processes with DAX and Power Query, including chain-method budget variance analysis.
- Built annual budget models and led consolidation and preparation of materials for board approval.

ivi.ru Video Streaming Service**Mar. 2021 – Jun. 2021****Senior Business Analyst** in Business Development Department

Moscow, Russia

- Redesigned weekly C-level reporting by combining large finance and operational datasets, reducing preparation time by 50% and giving leadership a unified view of company performance.
- Enhanced partnership pre- and post-analysis models using SQL and Tableau data to support commercial decisions and product launches.

KPMG**Oct. 2015 – Mar. 2021****Senior Consultant** in Transaction Services (Deal Advisory)

Moscow, Russia

- Aided clients in Financial Due Diligence related to Russian and international M&A transactions.
- Verified business models with preparation of inputs for valuation models.
- Performed revenue and profit quality analysis considering markets, operational schemes, and groups.

Senior Consultant in Accounting Advisory Services

- Developed data collection and transformation packages using VBA for Excel for clients.
- Contributed to the design of a comprehensive costing system within a vertically integrated holding.
- Adapted a revenue calculation model with multiple performance obligations (IFRS 15 implementation).

PERSONAL PROJECT

- Built an end-to-end learning data platform (ampere-data.work) that generates synthetic operational data and transforms it through Bronze, Silver, and Gold Delta Lake layers using PySpark, Polars, DuckDB, Airflow, and dbt, with Unity Catalog OSS governance and BI consumption.
- Automated a connected Kubernetes environment spanning a home-lab Ubuntu server and Hetzner infrastructure using Terraform, Helm, and deployment automation.
- Developed an authenticated reporting application with a SvelteKit frontend, FastAPI backend, and Streamlit.

EDUCATION

Financial University under the Government of the Russian Federation**Mar. 2018**

Master's Degree in Economics

Moscow, Russia
